WORK EXPERIENCE

Product Manager

ICICI Bank, Ahmedabad

June 2023 - Dec 2023

- Developed comprehensive BRS and test cases for the trade finance department to ensure clarity and alignment of project objectives. Collaborated with cross-functional teams to gather requirements, define scope, and document detailed specifications.
- Led the development and enhancement of customer-facing applications, ensuring a user-friendly experience and seamless functionality. Conducted thorough UAT for new product introductions and migrations, identifying and resolving issues to guarantee smooth deployment.
- Worked on implementation and optimization of TradeOnline, managed the migration of InstaEPC to NTS and Helpdesk to iCRM.

PROJECTS

Money Mate

[GitHub](#)

Web Development

- Developed a MERN stack expense tracker application, incorporating Redux for efficient state management and React Query for optimized data fetching and synchronization.
- Implemented a robust category-based system allowing users to create and manage income and expense categories, and dynamically link transactions to these categories.
- Focused on scalability and performance, ensuring seamless user interactions through the integration of Redux.
- Enhanced user experience by integrating interactive data visualizations, leveraging Chart.js.

Estate Edge

[GitHub](#)

Web Development

- Developed a MERN stack real estate website allowing users to list properties for sale or rent.
- Integrated Firebase for storing images, implemented secure user authentication with JWT and Google OAuth.
- Built responsive user interfaces using React.js, Tailwind CSS and managed state with Redux.
- Developed features like advanced property search and image upload.

ProShop

[GitHub](#)

Web Development

- An E-commerce platform built using the MERN stack ensuring seamless user experience and robust functionality.
- Integrated secure payment gateway (PayPal) and implemented authentication and authorization using JWT.
- Built responsive user interfaces using React.js and manages state with redux.

YelpCamp

[GitHub](#)

Web Development

- A web-app that allows users to browse, create and review campgrounds.
- Integrated authentication functionality using Passport.js to manage user authentication and secure access to features such as campground creation and reviews.
- Implemented features such as campground search, image uploading, and interactive maps using technologies like Mapbox and Cloudinary.

EDUCATION

Indraprastha Institute of Information Technology (IIIT Delhi)

Delhi, India

M.tech (Computer Science), CGPA - 7.32

July 2021 - June 2023

Silver Oak College of Engineering and Technology (GTU)

Ahmedabad, India

B. E (Computer Engineering), CGPA - 9.52

July 2017 - June 2021
